Project Team: Moore & Bruggink Site
Engineering

Joseph D. Camp, P.E., Project Manager/Engineer
Steven J. Green, P.S., Chief Surveyor
The Architectural Group
Clifford Buck Construction Company

Project Description:

Moore & Bruggink provided the site engineering for this medical facility, a 72,000 square foot structure on two levels specializing in outpatient orthopedic surgery and rehabilitation services. It includes two levels of parking; municipal sanitary sewer; water and fire connections; and complete sustainable stormwater system design with retention on site under the parking lot. The facility was placed on a picturesque but environmentally challenging creekside site. The required extensive wetlands permitting and floodplain permitting were successfully accomplished. Interface with the nearby Mercy Hospital medical campus was also required for the successful completion of this project.
