Project Description:

The project consisted of the widening of Riley Street from State Street to Fairview Avenue from a rural two-lane road with ditch section to a three-lane roadway with curb and gutter and storm sewer. Several challenges were met as a part of this project. The existing roadway had to remain open as several industries had their only access from Riley Street and had to remain open. Another challenge included the project funding. This project was funded by a grant from the MEDC with a Community Development Block Grant and Michigan Economic Development Fund Grant. All grant requirements were met and the project came in under budget and ahead of schedule.
