Kent County, Michigan

Date Completed: August 2009

Project Cost: \$2,400,000

Project Team: Moore & Bruggink, Inc.  
Tower Pinkster Titus  
RJM Design  
Christman Company

*New Front Entrance*

Project Description: This school's improvement project included front entrance traffic flow improvements, building additions, building interior improvements and site grading improvements. Moore & Bruggink was responsible for the site related improvements. The traffic flow improvements required revising the parking layout, expanding the existing front parking lot and revising the storm sewer layout. Site grading changes throughout the school property solved chronic drainage issues, improved overall site stormwater management and enclosed a ditch to provide a safer playground area.
